Smart Lipo

Topic: Smart Lipo / Smartlipo Laser Lipolysis

Written by: Dr Joshua Berkowitz

Clinic: Wimpole Aesthetic Centre, London

Website: www.wimpoleaesthetics.co.uk

More and more women and men want to look and feel better about themselves but, despite working out and losing weight, some areas of fat are simply far too difficult to reduce. This is where Smart Lipo can help.

Smart Lipo is a remarkable treatment using a laser to melt away unwanted fat deposits. The Smart Lipo laser has been used extensively and is known to be safe and effective. It offers a simple way to remove unwanted fat deposits and the procedure is performed under sterile conditions in a special smartlipo theatre. The treatment is minimally invasive and the body can be shaped and contoured. In layman's terms, smartlipo is like 'laser liposuction'. It is however much safer than conventional liposuction. Smart Lipo is better than other treatments because the laser energy also interacts with the skin which results in proper skin shrinkage and tightening.

The cost of liposuction is much higher than Smart Lipo laser lipolysis, both in terms of money and trauma. Doctors for Smart Lipo know that this laser is safe, and the results are simply amazing!

A single treatment will take up to 1 - 2 hours (depending upon the area/areas treated) and is usually sufficient to get a good result, although a small percentage of patients may need a second treatment. Patients with health issues need not be excluded but special precautions may be needed. Most reasonably healthy patients can be treated and this should be discussed at a consultation with your smartlipo doctor.

How does the Smart Lipo laser lipolysis work?

The area of fat to be removed is infiltrated with local anaesthetic and a very fine (1mm) laser probe is then inserted directly into the fat to be removed. The laser beam is then methodically guided throughout the area and the liquefied fat is absorbed by your lymphatic system and the fat excreted.

Information on Smart Lipo Fat Reduction Treatment:
Wimpole Aesthetic Centre, 48 Wimpole Street, London, W1G 8SF, UK

What happens after the treatment?

There is usually very little bruising swelling or pain. You will be asked to wear a compression garment for up to 2 weeks after the treatment and you can usually return to most normal activities the next day.

Advantages over traditional liposuction?

- Smart Lipo has minimal discomfort compared to traditional liposuction.
- Smart Lipo requires minimal downtime.
- Smart Lipo has considerably less risk of bleeding and bruising than normal liposuction.
- Smart Lipo tightens the loose skin.
- Smart Lipo is a much safer procedure.

Find out more

To find out more about this procedure, please contact the Wimpole Aesthetic Centre and book a free private consultation with Dr Joshua Berkowitz. The Wimpole Aesthetic Centre is fully registered with the HealthCare Commission and Dr. Berkowitz is a qualified medical doctor with a great deal of medical and surgical experience. He is registered in the UK and in South Africa and is a member and fellow of many prestigious medical societies.
